

PITCH FOR EXAMPLE COMPANY • OCTOBER 2026

One place for data and AI that finds the answer_

A subtitle of one or two lines that says what the audience gets out of the next twenty minutes.

What we understood from your brief_

The lead under the heading sums the slide up in one sentence.

- ▲ **One system since 2011.** What used to be enough now slows the team down.
- ▲ **The pain is disconnected data,** not a missing tool: a simple question means manual exports.
- ▲ **Management needs one overview,** advisors need AI that fetches the answer itself.

NOT A REPLACEMENT OF YOUR IT

We offer a partnership: we add capacity where it is missing and hand the know-how back to your team.

A software company with its own product_

40+

senior developers

23+

delivered projects

16+

long-term clients

TYR

our own CRM the whole company runs on

Energy

Customer portals and mobile apps for distribution companies.

Banking

Secure integrations and internal tools for large teams.

Retail

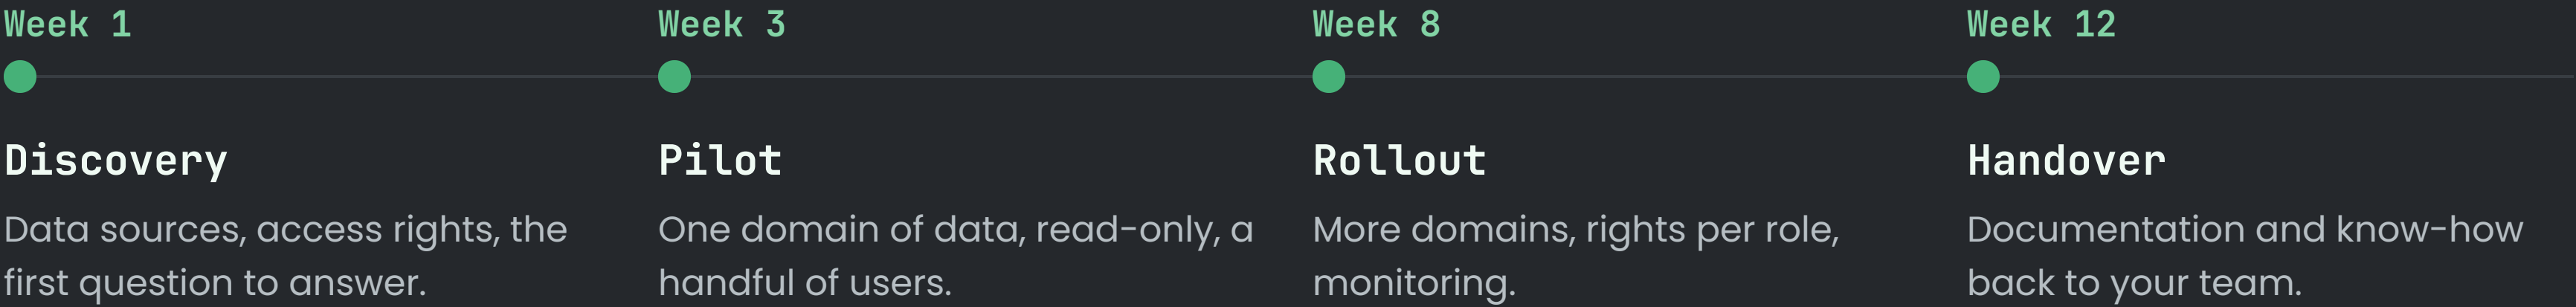

Splitting a large sales platform into independent services.

PART 2 • 10:15-11:00

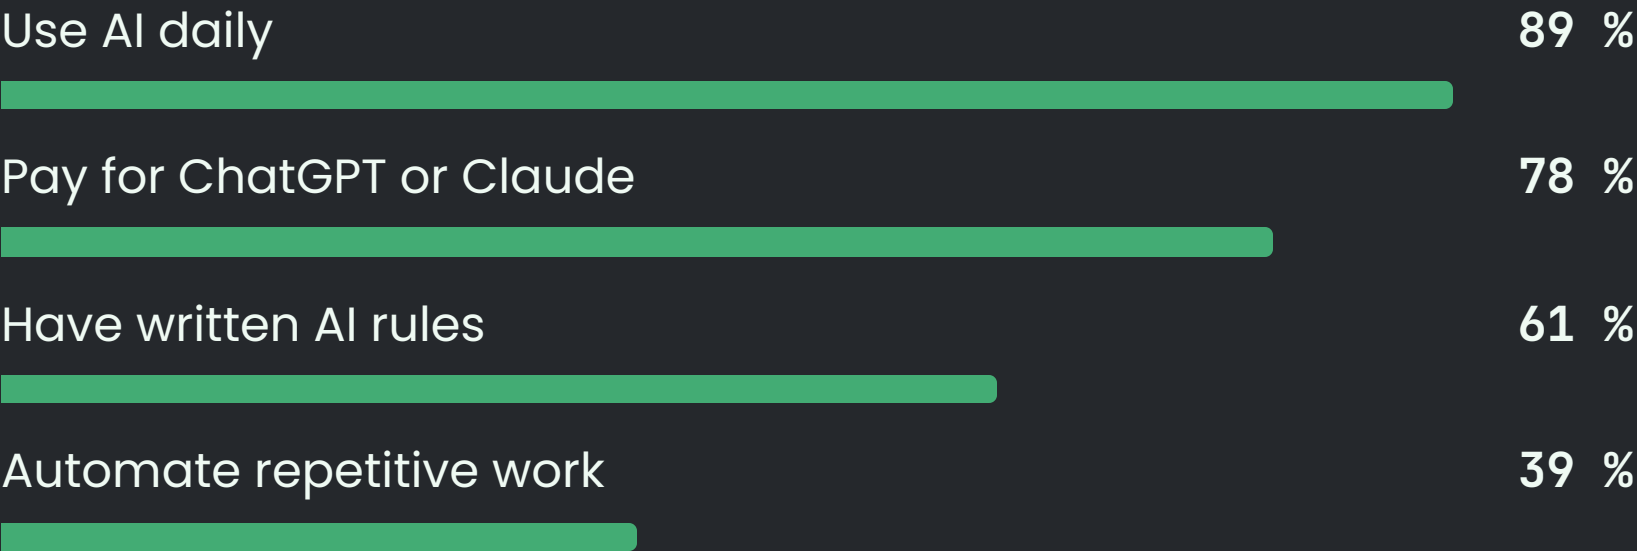

AI on top of your data_

What it costs, who checks it and how to decide between buying and building.

From pilot to production in one quarter_

How you answered_

Most of you already use AI every day, but fewer than half automate anything with it.

Charts are direct-labeled. One series uses chart color 1; more series follow the fixed order.

Thank you_

Let's find the first question your data should answer.
